

PROSTATE CANCER IS LATEST TOPIC FOR GP EDUCATION PROGRAM

Prostate cancer will be the main topic of the second session of the Bethesda Health Care's popular General Practitioner (GP) Education program. More than 40 medical practitioners are expected to attend this event held at the hospital café on 17 March 2016.

Entitled 'Management of Prostate Cancer – important updates for GP's', this session will be presented by Urological Surgeon Dr David Sofield, and Jo Milios, a men's health physiotherapist.

Topics that will be discussed :

- Surgery to correct complications of radical prostatectomy
- Recent advances in prosthetic surgery for incontinence and impotence in men
- After treatment for prostate cancer
- Prostate cancer screening – have we gone too far in the wrong direction in reducing PSA testing?
- Penile rehabilitation and exercise following prostatectomy
- Research news in pelvic floor training for men and peyronies disease
- Transferring knowledge from podium to practice
- How physiotherapy can help your patients

This is the third time prostate cancer and urological surgery has been part of the GP Education program that is now in its fourth year.

The 2016 program will be incorporating presentations on orthopaedics, bariatric surgery, breast cancer, and palliative care.
